# 4SeasonsSpa

## Four seasons luxury

Discover the luxury of a spa in your garden, on your balcony or in your house. Dream away in the warm water, whether it is spring, summer, fall or winter; you can experience the relaxation and well-being of a spa close at hand. With a 4SeasonsSpa you bring luxury to your life.

## Vision

Relax your body and mind whenever you want to, in your own living space. The healing, relaxing effects of warm water have been known since ancient times. 4SeasonsSpa lets you bring this wisdom into practice by making the best spas for your ultimate comfort.

## Craftsmanship

The 4SeasonsSpa brand guarantees a high quality hand-made product and design that satisfies the highest standards. Our specialists make beautiful, durable spas based on years of experience. Your individual wishes are always our main concern.

# Body and mind

## Health

Everyone knows that rest and relaxation are necessary to maintain good health. The combination of warm water and an intensive massage make relaxing in our spas even more effective. Both mind and body are able to come completely to rest. Whether you start the day refreshed or end the day relaxed, a moment for yourself in a 4SeasonsSpa ensures the optimal balance between body and mind.

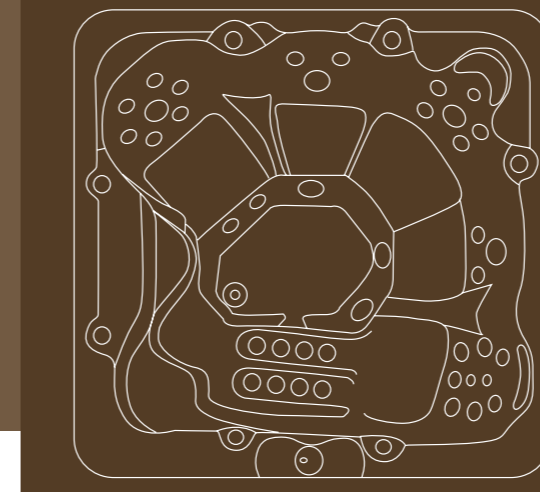

## Relaxation

The spas by 4SeasonsSpa are equipped with a wide array of therapeutic hydro-massage jets. Individual controls allow you to set the most comfortable mixture of water and air and the direction of these jets yourself. This versatility allows you to create the perfect, personal massage. Hydro massage therapy quickly relaxes, giving new energy and relieves tired or aching muscles and joints. The buoyant feeling one experiences combined with the warm water massage also

enhances your night's rest. To complete the experience, our adjustable LED chromo therapy lighting provides a proven positive effect on your state of mind. Together or alone The various 4SeasonsSpa models offer something for everyone. Whether together or alone, young or old, a spa is an exceptional experience. The soothing water and mood lighting make a spa an exciting adventure.

# Design

# Ergonomics

Thanks to ingenious design, the spas have high ergonomic benefits. This means that you always have the right support, regardless of your body type or height. Our spas offer everyone a comfortable position, whether large or small. Each seating or laying position has its own unique massage pattern, providing complete body relaxation.

# Aesthetics

## Exterior

Canadian cedar is used for the tasteful and timeless cabinetry of our spas. The wood treatment options ensure an extra-long life, as well as the desired colour and natural look. The cover is also integrated into the design, and is produced in our own studio from light and weatherproof materials. The extra handles and children locks make securing the cover even easier.

## Interior

The interior of the spa is made of

acrylic, a UV-resistant and colourfast material that reduces the likelihood of scratches and dents and is easy to clean. An extensive selection of colours are available for you to choose from.

## Entry and exit

The entry and exit is equipped with extra grip and is easy and safe for young and old. Matching steps can also be supplied, made from the same material as the cabinet. Easy and attractive!

# The Spa

## Always ready for use

The water temperature is kept constant by a high-quality and efficient heating system. This means that the spa is always ready for use.

### Energy-efficient

Every 4SeasonsSpa meets world class standards in terms of energy efficiency. Every aspect of our heating and monitoring systems have been designed to save energy.

The water temperature in the spa is efficiently maintained by a combination of the a high density cover

and full-foam insulation to ensure minimum heat loss. The durable LED lighting is also more efficient than conventional lighting systems. 4SeasonsSpa can also provide further energy efficient options in the form of solar energy or a connection to your central heating system.

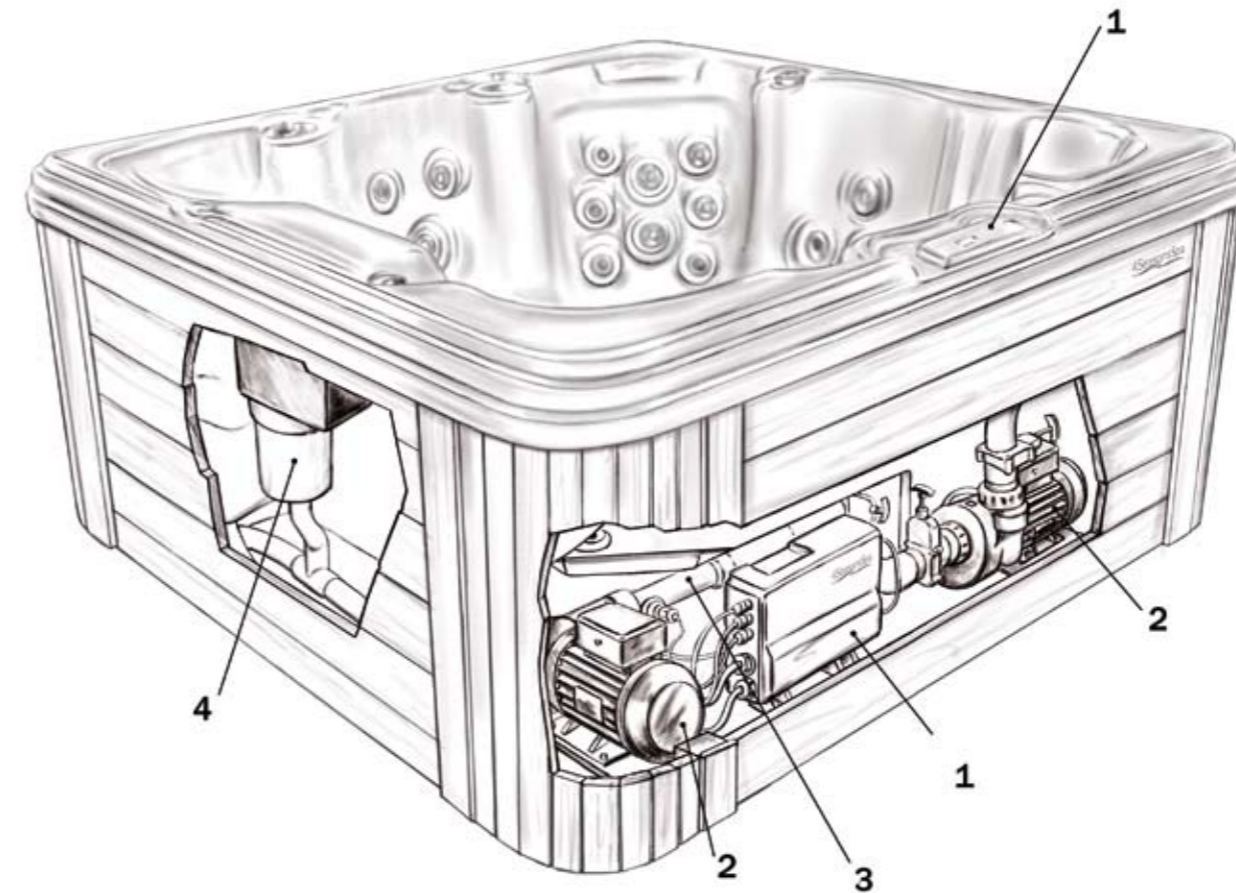

### Waterpurification

All 4SeasonsSpa models have a high-performance filter system that keeps the water clean. This allows you to refresh the water only a few

times per year. In addition, an ozonator assists with sanitising the water, keeping the need for maintenance to a minimum.

### Lighting & Music

The internal LED chromo-therapy lighting gives the spa a special soothing atmosphere in the evening. The entrance and exit are also safely lit. The high-fidelity sound system (optional) provides music in your spa. You can listen to the radio; play CDs or MP3 tracks in your spa.

### Operation

Comfort and convenience are the basis of the design. With a digital control panel (1) you can turn on the water pumps (2) that will activate the jets. It also allows you to control the temperature (3), filtration (4) and the lighting quickly and easily.

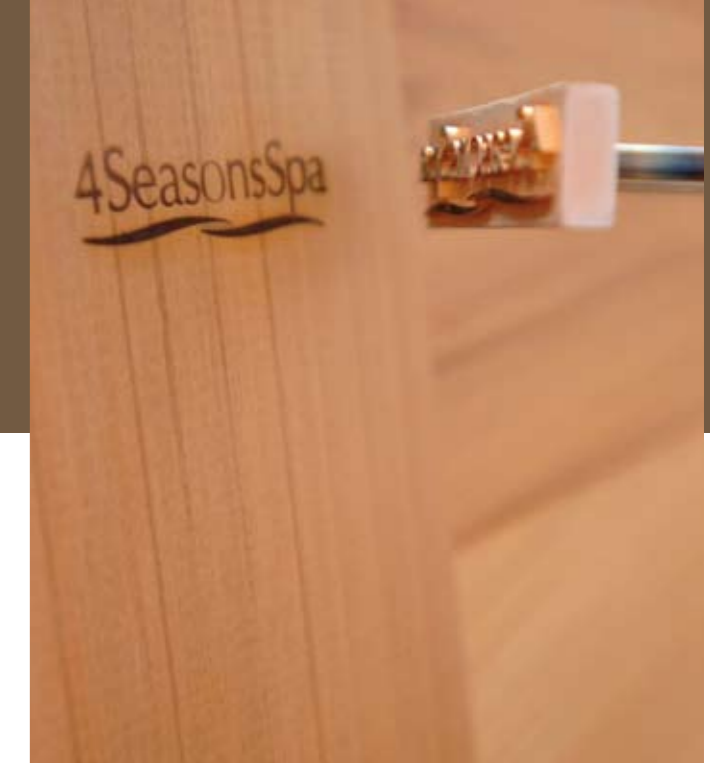

### Proof of quality

4SeasonsSpa uses only parts that meet the highest European quality standards. We are one of the few manufacturers in the world to have our complete product line TÜV approved and CE certified. This independent quality control ensures consistent top quality products for you as a customer.

# Craftsmanship

## Made to measure

Modern technology, traditional craftsmanship and attention to detail are combined to form the foundations of our spas. The different models each have their own specific characteristics, so there is always a spa that meets your needs. After you choose the finish, colour and cabinet style of the spa, our craftsmen take care of the production of your unique 4SeasonsSpa.

### Natural materials

4SeasonsSpa uses only the best natural

materials. The exterior is finished with the highest quality Canadian cedar. Cedar has an excellent reputation due to its natural resistance to water. This makes it ideal for outdoor use. Its unique structural beauty patterns with large growth rings and lack of resin mean that cedar has greater longevity than other woods.

Select a Red Cedar or Grey Wash treatment and your spa will fit beautifully into any natural surroundings.

## European product

4SeasonsSpa guarantees top European quality. Our spas are designed and handcrafted by personnel drawing on years of experience and a passion for their work. Compared to other manufacturers, we devote 30% more time to the production of our spas. You can see the results of this in the smallest details, such as the quality of the finishing, the audio and lighting system integrated into the design, and the stout framework. Finally, we test each individual spa for 24 hours. Only when it has passed our test is the 4SeasonsSpa trademark stylishly branded into the cedar wood as a seal of quality.

# Service

## Installation

A dealer near you can install your 4SeasonsSpa. Only an electric connection and a flat, sturdy foundation are necessary for installation. Your spa can be filled with an ordinary garden hose, and requires no special drainage connection.

## Dealernetwork

A quality product requires fast and professional service. We can offer this because we produce our spas in Europe and enjoy the benefit of an extensive and professional dealer network.
